

## You are invited to join our sponsored symposium

### International Insights on Automation in Oncology Compounding : Advancing Safety and Efficiency

We are delighted to invite you to the sponsored symposium titled **“International Insights on Automation in Oncology Compounding : Advancing Safety and Efficiency”** at the ISOPP 2025 conference in Victoria, Canada.

This symposium will feature esteemed pharmacists from renowned institutions sharing their experiences with IV automation in oncology compounding.

The session will cover international experiences on the adoption and use of automation to enhance patient safety, reduce staff exposure, and streamline pharmacy workflows. Our guests will talk about user training and qualification, drugs produced by automated systems, and future perspectives on IV automation. Join us to gain valuable insights into the advancements and challenges in this critical area of oncology pharmacy.
