

You are invited to join our Symposium

Innovative technologies for safe and economical handling of hazardous drugs: new frontiers in compounding automation, CSTD vapor containment, and drug sterility in the modern pharmacy

 **Thursday | April 3rd**

 **15:30-16:30 PDT**

 **Lecture Theatre - Victoria Conference Centre**

Program Objectives

01

Educating healthcare personnel on the safe handling of hazardous drugs through the use of innovative technologies in the pharmacy setting.

02

Providing insights into real-life evidence, an overview of regulatory aspects, and evolving technologies for the safe and sterile handling of hazardous drugs.

03

Enable healthcare professionals to make better decisions while implementing technologies according to new guidelines.

Guest Speakers

Dr. Paul Sessink

Founder and Managing Director of Exposure Control, Sweden

Dr. Robert Terkola
